

Design/Build Awards 2009

DEADLINE FOR ENTRIES: JULY 15, 2009

GUIDELINES

In addition to several categories honoring the finest examples of Design/Build work being done across the country, we will also accept for consideration outstanding examples of work done under the Design/Bid and Design/Assist delivery methods.

The key element in any project category will be the HVACR contractor's ability to take a leading role in providing the ultimate HVACR system for the benefit of the customer.

There will be subcategories to ensure that projects compete against others of the same cost. Any project or projects you wish to enter must be implemented on commercial buildings (including industrial, high-rise residential, or institutional).

PLEASE INCLUDE:

- 1. Your contact information** (title, company name, address, telephone and fax numbers, and e-mail address).
- 2. The customer's company name and location.** Include a contact name, title, address, telephone and fax numbers, and e-mail address. Please make sure you have the permission of your customer before entering.
- 3. The total installed cost of the job.** The mechanical costs are based on the total price to the customer for all parts and labor for HVAC, refrigeration, or plumbing work related to comfort or process control.
- 4. A list of names and project responsibilities** of key individuals in your company (and the customer's company, if applicable) who were directly responsible for the successful design and implementation of the job.
- 5. A list of the products** (manufacturer, type of equipment, and model number) that were used on the project.
- 6. A summary of the project.** Please explain how your company won the project, and how your company was able to deliver a quality project on time and on budget under the delivery method used (Design/Build, Design/Assist, or Design/Bid).
The summary of your project should include information on:
 - Design quality
 - Installation quality
 - Comfort
 - Control
 - Energy efficiency
 - IAQ improvement
 - Environmental impact
 - Unique challenges resolved
 - Thorough commissioning
- 7. High quality job pictures,** pertinent diagrams, blueprints, load calculations, etc. Digital photos are preferred, on CD.
